

Datasheet for ABIN6917919

**anti-GIT2 antibody (Alexa Fluor 647)**[Go to Product page](#)

## Overview

|              |                                                     |
|--------------|-----------------------------------------------------|
| Quantity:    | 100 µL                                              |
| Target:      | GIT2                                                |
| Reactivity:  | Human, Rat, Mouse                                   |
| Host:        | Rabbit                                              |
| Clonality:   | Polyclonal                                          |
| Conjugate:   | This GIT2 antibody is conjugated to Alexa Fluor 647 |
| Application: | Please inquire                                      |

## Product Details

|                   |                                     |
|-------------------|-------------------------------------|
| Cross-Reactivity: | Human, Mouse (Murine), Rat (Rattus) |
| Characteristics:  | GIT2 Conjugated Antibody            |

## Target Details

|                   |                                                                            |
|-------------------|----------------------------------------------------------------------------|
| Target:           | GIT2                                                                       |
| Alternative Name: | GIT2 ( <a href="#">GIT2 Products</a> )                                     |
| Pathways:         | <a href="#">Regulation of G-Protein Coupled Receptor Protein Signaling</a> |

## Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF647 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
