Specificity:

Cross-Reactivity:

Purification:

Quantity:	100 μg	
Target:	SNCA	
Binding Specificity:	AA 124-134, pSer129	
Reactivity:	Human	
Host:	Rabbit	
Clonality:	Monoclonal	
Conjugate:	This SNCA antibody is conjugated to FITC	
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (IHC), Immunocytochemistry (ICC)	
Product Details		
Immunogen:	Human alpha synuclein AA 124-134: AYEMP-pS-EEGYQ-Cys	
Clone:	J18	
Isotype:	lgG	

Expressed principally in brain but is also expressed in low concentrations in all tissues

examined except in liver. Concentrated in presynaptic nerve terminals., Binds to phosphorylated

serine 129 on alpha synuclein. Does not detect unphosphorylated serine 129 alpha synuclein

Human, Mouse

Affinity Purified

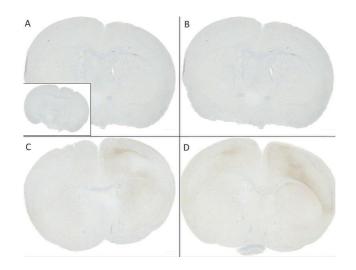

Target Details

Target:	SNCA	
Alternative Name:	Alpha Synuclein (SNCA Products)	
Background:	Alpha-Synuclein (SNCA) is expressed predominantly in the brain, where it is concentrated in	
	presynaptic nerve terminals (1). Alpha-synuclein is highly expressed in the mitochondria of the	
	olfactory bulb, hippocampus, striatum and thalamus (2). Functionally, it has been shown to	
	significantly interact with tubulin (3), and may serve as a potential microtubule-associated	
	protein. It has also been found to be essential for normal development of the cognitive	
	functions, inactivation may lead to impaired spatial learning and working memory (4). SNCA	
	fibrillar aggregates represent the major non A-beta component of Alzheimers disease amyloid	
	plaque, and a major component of Lewy body inclusions, and Parkinson's disease. Parkinson's	
	disease (PD) is a common neurodegenerative disorder characterized by the progressive	
	accumulation in selected neurons of protein inclusions containing alpha-synuclein and ubiquitin	
	(5, 6). Alpha synuclein phosphorylated at serine 129 constitutes 90 % of the alpha synuclein	
	found in Lewy bodies (7, 8).	
Gene ID:	6622	
NCBI Accession:	NP_000336	
UniProt:	P37840	
Pathways:	Synaptic Membrane, Regulation of G-Protein Coupled Receptor Protein Signaling, Positive	
	Regulation of Endopeptidase Activity, Regulation of Carbohydrate Metabolic Process, Platelet-	
	derived growth Factor Receptor Signaling, Negative Regulation of Transporter Activity,	
	Regulation of long-term Neuronal Synaptic Plasticity	
Application Details		
Application Notes:	• WB (1:500)	
	optimal dilutions for assays should be determined by the user.	
Comment:	A 1:500 dilution of ABIN6932878 was sufficient for detection of Alpha Synuclein pSer129 in 10	
	μg of Mouse Brain by ECL immunoblot analysis using Goat Anti-Rabbit IgG:HRP as the	
	secondary antibody.	
Restrictions:	For Research Use only	
Handling		

Handling

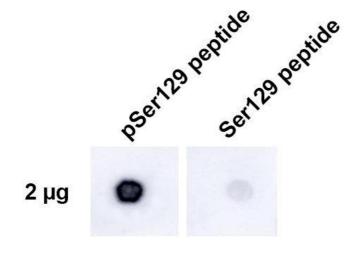

Concentration:	1 mg/mL	
Buffer:	PBS pH 7.4, 50 % glycerol, 0.09 % Sodium azide, Storage buffer may change when conjugated	
Preservative:	Sodium azide	
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.	
Storage:	4 °C	
Storage Comment:	Conjugated antibodies should be stored at 4°C

Immunohistochemistry

Image 1. C57/BL6 mice were injected with sonicated recombinant mouse alpha synuclein monomers or fibrils at 8 weeks of age. Mice were unilaterally injected in the dorsal striatum (bregma AP + 0.2 mm, L +/1 2.0 mm, V - 3.0 mm) and sacrificed 30 days post-injection. (A) 1.25 μLmouse alpha synuclein monomers (ABIN5651242). (B) 2.5 μ Lmouse alpha synuclein monomers (ABIN5651242). (C) 2.5 μg alpha synuclein PFFs (ABIN5651245). (C) 5 μg alpha synuclein PFFs (ABIN5651245) Inset: PBS (negative control). Primary antibody: Anti-Alpha Synuclein pSer129 (ABIN6932878) at 1:10 000. Secondary antibody: anti-rabbit HRP. Mice injected with PFF displayed alpha synuclein staining in the striatum and cortex and contralateral to the injection site.

Dot Blot

Image 2. Dot Blot analysis using Rabbit Anti-Alpha Synuclein pSer129 Monoclonal Antibody, Clone J18 (ABIN6932878). Tissue: alpha synuclein peptide. Primary Antibody: Rabbit Anti-Alpha Synuclein pSer129 Monoclonal Antibody (ABIN6932878) at 1:500 for 2 hours at RT with shaking . Secondary Antibody: Goat anti-rabbit IgG:HRP at 1:4000 for 1 hour at RT with shaking . Phospho peptide sequence: AYEMP-pS-EEGYQ. Non-phospho peptide sequence: AYEMPSEEGYQ. This sequence is the same for human, mouse, and rat.

Western Blotting

Image 3. Western Blot analysis of Mouse Brain showing detection of Alpha Synuclein pSer129 protein using Rabbit Anti-Alpha Synuclein pSer129 Monoclonal Antibody, Clone J18 (ABIN6932878). Lane 1: MW ladder. Lane 2: Mouse brain. Load: 15 μg. Block: 5 % BSA in TBST. Primary Antibody: Rabbit Anti-Alpha Synuclein pSer129 Monoclonal Antibody (ABIN6932878) at 1:500 for 2 hours at RT with shaking. Secondary Antibody: Goat anti-mouse IgG:HRP at 1:4000 for 1 hour at RT with shaking. Color Development: Chemiluminescent for HRP (Moss) for 5 min in RT. Multiple bands due to phosphorylation.
