anti-VPS35 antibody (HRP)

Go to Product page

Overview

Quantity:	100 μg
Target:	VPS35
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This VPS35 antibody is conjugated to HRP
Application:	Western Blotting (WB), Immunoprecipitation (IP), Immunofluorescence (IF), Immunocytochemistry (ICC)

Product Details

Immunogen:	Full length recombinant human VSP35
Clone:	7E4
Isotype:	lgG2a
Specificity:	Ubiquitous. Highly expressed in brain, colon, heart, kidney, ovary, placenta, skeletal muscle, small intestine, testis, thymus.,Detects ~92 kDa.
Cross-Reactivity:	Human, Mouse, Rat
Purification:	Protein G Purified

Target Details

- arget Betane		
Target:	VPS35	

Target Details

Storage Comment:

rarget Details	
Alternative Name:	VPS35 (VPS35 Products)
Background:	Vacuolar Protein Sorter-35 (VPS35) is a component of the retromer complex, which is essential for endosome-to-Golgi retrieval of membrane proteins. VPS35 mutations such as D620N have been linked to Parkinson's Disease (PD) (1,2) and affect retromer function, protein homeostasis, and mitochondria (3).
Gene ID:	55737
NCBI Accession:	NP_060676
UniProt:	Q96QK1
Application Details	
Application Notes:	 WB (1:1000) ICC/IF (1:200) IP (1:200) optimal dilutions for assays should be determined by the user.
Comment:	A 1:1000 dilution of ABIN6932927 was sufficient for detection of VPS35 in 10 µg of SH-SY5Y by ECL immunoblot analysis using Goat Anti-Mouse IgG:HRP as the secondary antibody.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 mg/mL
Buffer:	PBS pH 7.4, 50 % glycerol, 0.09 % Sodium azide, Storage buffer may change when conjugated
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	4 °C

Conjugated antibodies should be stored at 4°C

Immunoprecipitation

Image 1. Immunoprecipitation analysis using Mouse Anti-VPS35 Monoclonal Antibody, Clone 7E4 (ABIN6932927). Tissue: embryonic fibroblast. Species: Mouse. Primary Antibody: Mouse Anti-VPS35 Monoclonal Antibody (ABIN6932927). Three amounts of ABIN6932927 (3, 1 and 0.3 μ g) were non-covalently coupled to 10 μ Lof A/G sepharose beads for 1 hour at 4 °C and next incubated with 250 μ g of MEF lysate for 2 hours at 4 °C.

Western Blotting

Image 2. Western Blot analysis of Human, Mouse A549, MEF showing detection of VPS35 protein using Mouse Anti-VPS35 Monoclonal Antibody, Clone 7E4 (ABIN6932927). Lane 1: Molecular Weight Ladder. Lane 2: VPS35 KO A549 cells. Lane 3: mouse embryonic fibroblast cells.. Load: 8 μg each A549 and MEF. Primary Antibody: Mouse Anti-VPS35 Monoclonal Antibody (ABIN6932927) at 1:5 (tissue culture supernatant). Secondary Antibody: Donkey anti-mouse IRDye 800CW at 1:25000 in TBS-T.

Immunoprecipitation

Image 3. Immunoprecipitation analysis using Mouse Anti-VPS35 Monoclonal Antibody, Clone 7E4 (ABIN6932927). Tissue: A549 cells. Species: Human. Primary Antibody: Mouse Anti-VPS35 Monoclonal Antibody (ABIN6932927). 500 μ L cell culture supernatants were incubated with 10 μ L of Protein A/G resin beads for 1 hour at 4 °C. ABIN6932927 clone 7E4 depletes virtually all of the VPS35 from the A549 cell extract..

Please check the product details page for more images. Overall 7 images are available for ABIN6932927.
