## anti-C4A antibody

| ( ) | 1/0 | r\ /1 | 014 |   |
|-----|-----|-------|-----|---|
| ( ) | ve  | I V I | -v  | V |
|     |     |       |     |   |

| Quantity:    | 100 μg  |
|--------------|---|
| Target:      | C4A (C4a)   |
| Reactivity:  | Human   |
| Host:        | Mouse   |
| Clonality:   | Monoclonal  |
| Conjugate:   | This C4A antibody is un-conjugated  |
| Application: | ELISA, Coating (Coat), Immunohistochemistry (Formalin-fixed Sections) (IHC (f)) |

#### **Product Details**

| Product Details |  |
|-----------------|--|
| Immunogen:      | Recombinant full-length human Complement 4d protein  |
| Clone:          | C4D204   |
| Isotype:        | IgG1 kappa   |
| Specificity:    | This MAb is specific to Complement 4d (C4d) and reacts with the secreted as well as cell-          |
|                 | bound C4d.C4d is a degradation product of the activated complement factor C4b. Complement          |
|                 | 4b is typically activated by binding of Abs to specific target molecules. Following activation and |
|                 | degradation of the C4 Molecule, thio-ester groups are exposed, which allow transient, covalent     |
|                 | binding of the degradation product Complement 4d to endothelial cell surfaces and                  |
|                 | extracellular matrix components of vascular basement membranes near the sites of C4                |
|                 | activation. The presence of C4d in peritubular capillaries is a key indicator for acute humoral    |
|                 | (i.e. antibody-mediated) rejection of kidney, heart, pancreas and lung allografts. As an           |
|                 | established marker of antibody-mediated acute renal allograft rejection and its proclivity for     |
|                 | endothelium, this component can be detected in peritubular capillaries in chronic renal allograft  |
|                 |  |

#### **Product Details**

|                             | rejection as well as hyperacute rejection, acute vascular rejection, acute cellular rejection, and |
|-----------------------------|--|
|                             | borderline rejection. It has been shown to be a significant predictor of transplant kidney graft   |
|                             | survival. Anti-C4d, combined with anti-C3d, can be utilized as a tool for diagnosis of allograft   |
|                             | rejection that may warrant a prompt and aggressive anti-rejection treatment.                       |
| Cross-Reactivity (Details): | Human.   |
| Purification:               | 1.0mg/ml of Ab purified from Bioreactor by Protein A/G.  |
| Target Details              |  |
| Target:                     | C4A (C4a)  |
| Alternative Name:           | C4A (C4a Products)   |
| Background:                 | Acidic Complement C4, Basic C4, C4-1, C4a Anaphylatoxin, C4A, C4A2, C4A3, C4A4, C4A6, C4b,         |
|                             | C4B1, C4B12, C4d fragment, C4F, C4S, Complement C4 Gamma Chain, Complement                         |
|                             | Component 4A, Complement Component 4B,Complement 4d (C4d) (Acute Humoral Rejection                 |
|                             | Marker)  |
|                             | Cellular localisation: Intracytoplasmic vacuoles of endothelial cells and Secreted                 |
| Molecular Weight:           | 192kDa (predicted)   |
| Gene ID:                    | 720, 721, 534847   |
| Pathways:                   | Complement System  |
| Application Details         |  |
| Application Notes:          | Known_Application: ELISA (For coating use Ab at 1-2 µg/mL order Ab without BSA),                   |
|                             | Immunohistochemistry (Formalin-fixed) (1:200-1:400 for 30 minutes at RT)(Staining of               |
|                             | formalin-fixed tissues requires heating tissue sections in 1 mM EDTA, pH 7.5-8.5, for 45 min at    |
|                             | 95&degC followed by cooling at RT for 20 minutes)Optimal dilution for a specific application       |
|                             | should be determined.  |
|                             | Positive_Control: Rejected Renal Transplant Tissue.  |
| Restrictions:               | For Research Use only  |
| Handling                    |  |
| Concentration:              | 1.0 mg/mL  |
| Buffer:                     | Prepared in 10 mM PBS, WITHOUT BSA and Azide.  |
|                             |  |

### Handling

| Preservative:    | Azide free  |
|------------------|---|
| Storage:         | -20 °C,-80 °C   |
| Storage Comment: | Antibody without azide store at -20 to -80 °C. Antibody is stable for 24 months. Non-hazardous. |
| Expiry Date:     | 24 months   |
