| _ |   |   |    |    |   |
|---|---|---|----|----|---|
|   | W | 0 | rv | 10 | W |

| Quantity:    | 100 μg  |  |
|--------------|---|--|
| Target:      | NFE2L1  |  |
| Reactivity:  | Human   |  |
| Host:        | Mouse   |  |
| Clonality:   | Monoclonal  |  |
| Conjugate:   | This NFE2L1 antibody is un-conjugated   |  |
| Application: | Western Blotting (WB), Immunohistochemistry (Formalin-fixed Sections) (IHC (f)) |  |

## **Product Details**

| Immunogen:   | Recombinant full-length human NRF1 protein  |
|--------------|---|
| Clone:       | NRF1-2609   |
| Isotype:     | IgG1 kappa  |
| Specificity: | The NF-E2 DNA binding protein is composed of two subunits, p45 and MafK, and it regulates       |
|              | expression of globin genes in developing erythroid cells through interaction with Maf           |
|              | recognition elements (MAREs). A family of NF-E2 related proteins, which are collectively known  |
|              | as the Cap 'n' collar (CNC) family and include Nrf1 (also designated TCF11), Nrf2 and Nrf3, are |
|              | bZIP transcription factors that heterodimerize with Maf proteins to bind MARE sequences. The    |
|              | Nrf proteins also bind the antioxidant response element (ARE) and are implicated in the         |
|              | regulation of detoxification enzymes and the oxidative stress response. They do so by           |
|              | heterodimerizing with Jun family members (c-Jun, JunB and JunD) to activate gene expression,    |
|              | specifically the detoxifying enzyme, NQ01. Nrf2 is widely expressed and is thought to           |
|              | translocate to the nucleus after treatment with xenobiotics and antioxidants, which stimulate   |

## **Product Details**

|                             | its release from a repressor protein Keap1. Nrf3 is highly expressed in placenta, B cells and  |  |
|-----------------------------|--|--|
|                             | monocytes.   |  |
| Cross-Reactivity (Details): | Human.   |  |
| Purification:               | 1.0mg/ml of Ab purified from Bioreactor by Protein A/G.  |  |
| Target Details              |  |  |
| Target:                     | NFE2L1   |  |
| Alternative Name:           | NFE2L1 (NFE2L1 Products)   |  |
| Background:                 | Alpha pal, Alpha palindromic-binding protein, Alpha-pal, locus control region factor 1, NFE2   |  |
|                             | related factor 1, Nuclear respiratory factor 1 (NFR-1),NRF1                                    |  |
|                             | Cellular localisation: Nucleus.  |  |
| Molecular Weight:           | 30kDa (bZIP region), 65-120kDa (glycosylated)  |  |
| Gene ID:                    | 4899, 654363   |  |
| UniProt:                    | Q16656   |  |
| Application Details         |  |  |
| Application Notes:          | Known_Application: Western Blot (1-2 μg/mL), Immunohistochemistry (Formalin-fixed) (1-2 μ      |  |
|                             | g/mL for 30 min at RT)(Staining of formalin-fixed tissues requires heating tissue sections in  |  |
|                             | 10 mM Tris with 1 mM EDTA, pH 9.0, for 45 min at 95&degC followed by cooling at RT for         |  |
|                             | 20 minutes), Optimal dilution for a specific application should be determined.                 |  |
|                             | Positive_Control: Ubiquitous expression, strongest in skeletal muscle.                         |  |
| Restrictions:               | For Research Use only  |  |
| Handling                    |  |  |
| Concentration:              | 1.0 mg/mL  |  |
| Buffer:                     | Prepared in 10 mM PBS, WITHOUT BSA and Azide.  |  |
| Preservative:               | Azide free   |  |
| Storage:                    | -20 °C,-80 °C  |  |
| Storage Comment:            | Antibody without azide store at -20 to -80 °C. Antibody is stable for 24 months. Non-hazardous |  |
| Expiry Date:                | 24 months  |  |
|                             |  |  |
