Target Details

Target:	IL-5 (IL5)	
Alternative Name:	IL-5 (IL5 Products)	
Background:	Interleukin 5 (IL5) is an interleukin produced by type-2 T helper cells and mast cells. IL-5 is	
	115-amino acid (in human, 133 in the mouse) -long TH2 cytokine that is part of the	
	hematopoietic family. Unlike other members of this cytokine family (namely interleukin 3 and	
	GM-CSF), this glycoprotein in its active form is a homodimer. Interleukin-5 has long been	
	associated with the cause of several allergic diseases including allergic rhinitis and asthma,
