## anti-CPS1 antibody

Image

#### Overview

| Quantity:    | 100 μg   |
|--------------|--|
| Target:      | CPS1   |
| Reactivity:  | Human, Dog   |
| Host:        | Mouse  |
| Clonality:   | Monoclonal   |
| Conjugate:   | This CPS1 antibody is un-conjugated                |
| Application: | Immunohistochemistry (IHC), Staining Methods (StM) |

#### **Product Details**

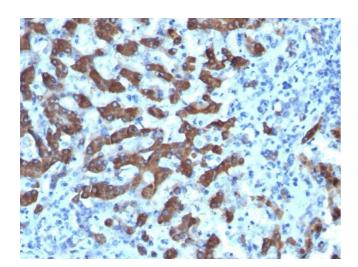

Immunogen:

| Clone:       | CPS1-1022  |
|--------------|--|
| Olone.       | 01 01 1022   |
| Isotype:     | IgG1 kappa   |
| Specificity: | This MAb recognizes a protein of 165 kDa, identified as carbamoyl phosphate synthetase 1         |
|              | (CPS1). This mitochondrial enzyme catalyzes synthesis of carbamoyl phosphate from                |
|              | ammonia and bicarbonate. This reaction is the first committed step of the urea cycle, which is   |
|              | important in the removal of excess urea from cells. Deficiency of CPS1 is an autosomal           |
|              | recessive disorder that causes hyperammonemia. CPS1 is a hepatocyte specific protein that        |
|              | localizes to the mitochondria of hepatocytes. It is a sensitive marker for distinguishing        |
|              | hepatocellular carcinomas (HCC) from other metastatic carcinomas as well as cholangio-           |
|              | carcinomas. HCC's occur primarily in the stomach, but they are also found in many other          |
|              | organs. CPS1 may also be a useful marker for intestinal metaplasia. Reportedly, strong           |
|              | expression of CPS1 correlates with smaller tumor size and longer patient survival. Occasionally, |

Recombinant human CPS1 protein

#### **Product Details**

| 1 Toddot Betaile    |  |
|---------------------|--|
|                     | CPS1 is also found in gastric carcinomas as well as in a few other non-hepatic tumors.           |
| Purification:       | Purified by Protein A/G  |
| Target Details      |  |
| Target:             | CPS1   |
| Alternative Name:   | CPS1 (CPS1 Products)   |
| Molecular Weight:   | ~165kDa  |
| Gene ID:            | 1373   |
| UniProt:            | P31327   |
| Pathways:           | Response to Growth Hormone Stimulus, Cellular Glucan Metabolic Process                           |
| Application Details |  |
| Application Notes:  | Positive Control: HeLa cells. Liver or Hepatocellular Carcinoma (HCC).                           |
|                     | Known Application: Immunohistochemistry (Formalin-fixed) (1-2 µg/mL for 30 minutes at            |
|                     | RT)(Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM citrate         |
|                     | buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes)Optimal dilution for a    |
|                     | specific application should be determined.   |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Concentration:      | 200 μg/mL  |
| Buffer:             | 10 mM PBS with 0.05 % BSA & 0.05 % azide.  |
| Preservative:       | Sodium azide   |
| Precaution of Use:  | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which                    |
|                     | should be handled by trained staff only.   |
| Storage:            | 4 °C,-80 °C  |
| Storage Comment:    | Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibod |
|                     | is stable for 24 months. Non-hazardous. No MSDS required.  |
| Expiry Date:        | 24 months  |
|                     |  |

### **Immunohistochemistry**

**Image 1.** Formalin-fixed, paraffin-embedded human Hepatocellular Ca stained with CPS1 Monoclonal Antibody (CPS1/1022).
