Overview

Quantity:	100 µg
Target:	CD235a/GYPA (GYPA)
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This CD235a/GYPA antibody is un-conjugated
Application:	Immunohistochemistry (IHC), Staining Methods (StM)

Product Details

Immunogen:	Recombinant human full-length GYPA protein
Clone:	GYPA-280
Isotype:	IgG1 kappa
Specificity:	Recognizes a sialoglycoprotein of 39 kDa, identified as glycophorin A (GPA). It is present on red
	blood cells (RBC) and erythroid precursor cells. It has been shown that glycophorin acts as the
	receptor for Sandei virus and parvovirus. Glycophorins A (GPA) and B (GPB), which are single,
	trans-membrane sialoglycoproteins. GPA is the carrier of blood group M and N specificities,
	while GPB accounts for S and U specificities. GPA and GPB provide the cells with a large mucin
	like surface and it has been suggested this provides a barrier to cell fusion, so minimizing
	aggregation between red blood cells in the circulation.
Purification:	Purified by Protein A/G
