Datasheet for ABIN6939836 Recombinant anti-Involucrin antibody

2 Images

Overview

Quantity:	100 µg
Target:	Involucrin (IVL)
Reactivity:	Human, Pig, Dog, Gorilla, Owl Monkey
Host:	Rabbit
Antibody Type:	Recombinant Antibody
Clonality:	Monoclonal
Conjugate:	This Involucrin antibody is un-conjugated
Application:	Immunohistochemistry (IHC), Immunostaining (ISt), Staining Methods (StM)

Product Details

Immunogen:	Recombinant human full-length Involucrin protein (IVRN)
Clone:	IVRN-2113R
lsotype:	lgG
Specificity:	It recognizes a protein of 66 kDa-170 kDa, identified as involucrin. In Western blotting of
	cultured human keratinocytes, this MAb reacts with a 120 kDa protein. It stains the involucrin in
	a variety of sizes: 170 kDa in MCF-7 cells, a doublet of \sim 115 kDa and 150 kDa in gorilla and owl
	monkey, 66 kDa in dog, and a doublet of 105 kDa in pig. Its epitope maps between codon 421-
	568 of human involucrin. Involucrin is expressed in a range of stratified squamous epithelia,
	including the cornea, which lacks a distinct cornified layer. In normal epidermis, it is first
	expressed in the upper spinous layers, and in keratinocyte cultures, all cells that have left the
	basal layer express it. Involucrin expression is altered in pathological conditions: in psoriasis

Product Details	
	and other benign epidermal hyperplasias, involucrin expression begins closer to the basal layer than normal, expression is abnormal in squamous cell carcinomas and premalignant lesions, and is reduced in severe dysplasias of the larynx and cervix.
No Cross-Reactivity:	Mouse (Murine)
Purification:	Purified by Protein A/G
Target Details	
Target:	Involucrin (IVL)
Alternative Name:	IVL (IVL Products)
Molecular Weight:	66-170kDa
Gene ID:	3713
UniProt:	P07476
Application Details	
Application Notes:	Positive Control: MCF-7 cells. Localized to upper spinous and granular layers in normal skin. Known Application: Immunohistochemistry (Formalin-fixed) (0.1-0.2 µg/mL for 30 min at RT)(Staining of formalin-fixed tissues is enhanced by digestion with trypsin or Protease XXV at 1 mg/mL PBS for 5 min at 37'C)(Note than enzyme digestion is better than citrate buffer based epitope unmasking)Optimal dilution for a specific application should be determined.
Restrictions:	For Research Use only
Handling	
Concentration:	200 µg/mL
Buffer:	10 mM PBS with 0.05 % BSA & 0.05 % azide.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	4 °C,-80 °C
Storage Comment:	Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.
