Quantity:	100 μg	
Target:	LSP1	
Binding Specificity:	AA 174-278	
Reactivity:	Human	
Host:	Mouse	
Clonality:	Monoclonal	
Conjugate:	This LSP1 antibody is un-conjugated	
Application:	ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Coating (Coat)	
Product Details		
Immunogen:	Recombinant fragment of human LSP1 protein (around aa174-278) (exact sequence is	
	proprietary)	
Clone:	LSP1-3042	
Isotype:	IgG1 kappa	
Purification:	Purified by Protein A/G	
Target Details		
Target:	LSP1	
Alternative Name:	LSP1 (LSP1 Products)	
Background:	LSP1 is a hematopoietic-expressed gene that encodes an F-actin-binding, leukocyte-specific	

(including B and T lymphocytes, granulocytes and macrophages), phosphoprotein. However, mRNA splice variants that do not encode the lympho-specific protein are expressed from this gene in nonlymphoid cell lines as well (myocytes, stromal cells and fibroblasts), suggesting pp52 has a divergent role in signal transduction. The pp52 (LSP1) locus maps to human chromosome 11p15.5, which is implicated in tumor-related chromosomal translocations found in chronic lymphocytic leukemia. The pp52 promoter contains key elements that control transcriptional activity including an initiator specifying the unique 5' terminus of pp52 mRNA, tandem pairs of Ets and SP1 motifs, and a single C/EBP motif. LSP1 binds the cytoskeleton and has been implicated in affecting cytoskeletal remodeling in a variety of leukocyte functions, including cell motility and chemotaxis.

Molecular Weight:	52kDa	
Gene ID:	4046	
UniProt:	P33241	

specific application should be determined.

Positive Control: Human tonsil, colon, spleen or Hodgkin's lymphoma (IHC-P).

Known Application: ELISA (For coating, order antibody without BSA), Optimal dilution for a

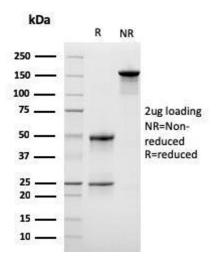

Application Details

Application Notes:

Expiry Date:

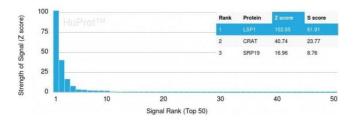

Restrictions: For Research Use only Handling Concentration: 200 μg/mL Buffer: 10 mM PBS with 0.05 % BSA & 0.05 % azide. Preservative: Sodium azide Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. Storage: 4 °C,-80 °C Storage Comment: Antibody with azide - store at 2 to 8 °C. Antibody without azide - store at -20 to -80 °C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.

SDS-PAGE

Image 1. SDS-PAGE Analysis Purified Monospecific Mouse Monoclonal Antibody to LSP1 (LSP1/3042). Confirmation of Purity and Integrity of Antibody.

Protein Array

Image 2. Analysis of Protein Array containing more than 19,000 full-length human proteins using LSP1 Mouse Monoclonal Antibody (LSP1/3042). Z- and S- Score: The Zscore represents the strength of a signal that a monoclonal antibody (MAb) (in combination with a fluorescently-tagged anti-IgG secondary antibody) produces when binding to a particular protein on the HuProtTM array. Z-scores are described in units of standard deviations (SD's) above the mean value of all signals generated on that array. If targets on HuProtTM are arranged in descending order of the Zscore, the S-score is the difference (also in units of SD's) between the Z-score. S-score therefore represents the relative target specificity of a MAb to its intended target. A MAb is considered to specific to its intended target, if the MAb has an S-score of at least 2.5. For example, if a MAb binds to protein X with a Z-score of 43 and to protein Y with a Z-score of 14, then the S-score for the binding of that MAb to protein X is equal to 29.
