Target Details

| Target: | MUC6 | |
|-------------------|---|--|
| Alternative Name: | rnative Name: MUC6 (MUC6 Products) | |
| Background: | d: The MUC6 gastric mucin is a secreted glycoprotein that plays an essential role in epithelial | |

| cyto-protection from acid, proteases, pathogenic microorganisms, and mechanical trauma in |
|---|
| the gastrointestinal tract. Mucin 6 expression is highest in the stomach and gall bladder, with |
| lower expression in the terminal ileum and right colon. In gastric cancer, Mucin 6 has an altered |
| expression. In normal stomach, Mucin 6 is associated with Lewis type 2, Mucin 6 is also |
| expressed in gastric metaplasia, duodenum and pancreas. Mucin 6 is a secretory mucin, |
| located in the deeper mucosal folds of human gall bladder, and its expression is altered with |
| increasing degrees of inflammation. |
