Datasheet for ABIN6940791 Recombinant anti-p53 antibody

4 Images

Overview

Quantity:	100 µg			
Target:	p53 (TP53)			
Reactivity:	luman			
Host:	Rabbit			
Antibody Type:	Recombinant Antibody			
Clonality:	Monoclonal			
Conjugate:	This p53 antibody is un-conjugated			
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Staining Methods (StM), Immunostaining (ISt)			

Product Details

Immunogen:	Recombinant full-length human TP53 protein
Clone:	TP53-1799R
lsotype:	lgG
Specificity:	The specificity of this monoclonal antibody to its intended target was validated by HuProtTM Array, containing more than 19,000, full-length human proteins. Recognizes a 53 kDa protein, which is identified as p53 suppressor gene product. It reacts with the mutant as well as the wild
	form of p53 protein. p53 is a tumor suppressor gene expressed in a wide variety of tissue types and is involved in regulating cell growth, replication, and apoptosis. It binds to MDM2, SV40 T antigen and human papilloma virus E6 protein. Positive nuclear staining with p53 antibody has been reported to be a negative prognostic factor in breast carcinoma, lung carcinoma,

	colorectal, and urothelial carcinoma. Anti-p53 positivity has also been used to differentiate
	uterine serous carcinoma from endometrioid carcinoma as well as to detect intratubular germ
	cell neoplasia. Mutations involving p53 are found in a wide variety of malignant tumors,
	including breast, ovarian, bladder, colon, lung, and melanoma.
Purification:	Purified by Protein A/G

Target Details

Target:	p53 (TP53)			
Alternative Name:	TP53 (TP53 Products)			
Molecular Weight:	53kDa			
Gene ID:	7157			
UniProt:	P04637			
Pathways:	p53 Signaling, MAPK Signaling, PI3K-Akt Signaling, Apoptosis, AMPK Signaling, Chromatin Binding, ER-Nucleus Signaling, Positive Regulation of Endopeptidase Activity, Hepatitis C, Protein targeting to Nucleus, Autophagy, Warburg Effect			

Application Details

Application Notes:	Positive Control: MDA-MB-231 cells. Breast or Colon carcinoma.		
	Known Application: Western Blot (0.5-1.0 μ g/mL), ,Immunohistochemistry (Formalin-fixed) (0.5-		
	1.0 μ g/mL for 30 minutes at RT), (Staining of formalin-fixed tissues is enhanced by boiling		
	tissue sections in 10 mM Tris with 1 mM EDTA, pH 9.0 for 10-20 min followed by cooling at RT		
	for 20 minutes),Optimal dilution for a specific application should be determined.		
Restrictions:	For Research Use only		

Handling

Concentration:	200 μg/mL			
Buffer:	10 mM PBS with 0.05 % BSA & 0.05 % azide.			
Preservative:	Sodium azide			
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.			
Storage:	4 °C,-80 °C			

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN6940791 | 07/25/2024 | Copyright antibodies-online. Handling

Storage Comment:

Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.

Expiry Date:

24 months

Protein Array

Image 2. Analysis of Protein Array containing more than 19,000 full-length human proteins using p53 Recombinant Rabbit Monoclonal Antibody (TP53/1799R) Z- and S- Score: The Z-score represents the strength of a signal that a monoclonal antibody (MAb) (in combination with a fluorescently-tagged anti-IgG secondary antibody) produces when binding to a particular protein on the HuProtTM array. Z-scores are described in units of standard deviations (SDs) above the mean value of all signals generated on that array. If targets on HuProtTM are arranged in descending order of the Z-score, the S-score is the difference (also in units of SDs) between the Z-score. S-score therefore represents the relative target specificity of a MAb to its intended target. A MAb is considered to specific to its intended target, if the MAb has an S-score of at least 2.5. For example, if a MAb binds to protein X with a Z-score of 43 and to protein Y with a Z-score of 14, then the S-score for the binding of that MAb to protein X is equal to 29.
