Datasheet for ABIN6940895 anti-VWF antibody (AA 1815-1939)

4 Images

Overview

Quantity:	100 µg
Target:	VWF
Binding Specificity:	AA 1815-1939
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This VWF antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Staining Methods (StM)

Product Details

Immunogen:	Recombinant fragment of human vWF protein (aa1815-1939) (exact sequence is proprietary)
Clone:	VWF-1465
lsotype:	lgG1 kappa
Purification:	Purified by Protein A/G

Target Details

Target:	VWF
Alternative Name:	VWF (VWF Products)
Background:	Von Willebrand Factor (vWF) is a multimeric glycoprotein that is found in endothelial cells,
	plasma and platelets. It acts as a carrier protein for Factor VIII and promotes platelet adhesion

Target Details

	and aggregation. vWF undergoes a variety of posttranslational modifications that influence the
	affinity and availability for Factor VIII, including cleavage of the propeptide and formation of N-
	terminal disulfide bonds. This antibody helps to establish the endothelial nature of some
	lesions of disputed histogenesis, e.g. Kaposi's sarcoma and cardiac myxoma. It is widely used
	for differentiating vascular lesions from those of other tissue differentiation within a panel of
	other vascular markers although not all tumors of endothelial differentiation contain this
	antigen.
Molecular Weight:	250kDa
Gene ID:	7450
UniProt:	P04275

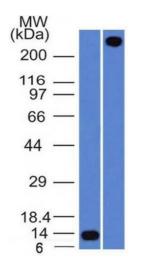

Application Details

Application Notes:	Positive Control: HUVEC cells. Tonsil.
	Known Application: Western Blot (1-2.0 μ g/mL), Immunohistochemistry (Formalin-fixed) (1-2 μ
	g/mL for 30 minutes at RT) (Staining of formalin-fixed tissues requires boiling tissue sections in
	10 mM Citrate Buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes)Optimal
	dilution for a specific application should be determined.
Restrictions:	For Research Use only

Handling

Concentration:	200 µg/mL
Buffer:	10 mM PBS with 0.05 % BSA & 0.05 % azide.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	4 °C,-80 °C
Storage Comment:	Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.
Expiry Date:	24 months

Western Blotting

Image 1. Western Blot Analysis A) Recombinant Protein (B) human lung lysate Using VWF Mouse Monoclonal Antibody (VWF/1465).

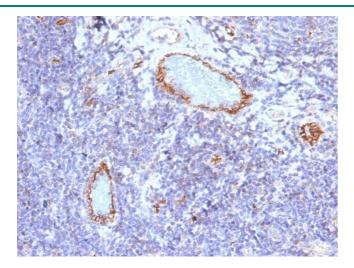

Protein Array

Image 2. Analysis of Protein Array containing >19,000 fulllength human proteins using vWF Mouse Monoclonal Antibody (VWF/1465) Z- and S- Score: The Z-score represents the strength of a signal that a monoclonal antibody (MAb) (in combination with a fluorescently-tagged anti-IgG secondary antibody) produces when binding to a particular protein on the HuProtTM array. Z-scores are described in units of standard deviations (SD's) above the mean value of all signals generated on that array. If targets on HuProtTM are arranged in descending order of the Zscore, the S-score is the difference (also in units of SD's) between the Z-score. S-score therefore represents the relative target specificity of a MAb to its intended target. A MAb is considered to specific to its intended target, if the MAb has an S-score of at least 2.5. For example, if a MAb binds to protein X with a Z-score of 43 and to protein Y with a Z-score of 14, then the S-score for the binding of that MAb to protein X is equal to 29.
