## Product Details

Immunogen:	Recombinant human full-length CD86 protein
Clone:	C86-2160R
Isotype:	lgG
Specificity:	Recognizes a protein of 70 kDa, which is identified as CD86. CD86 is a type I transmembrane glycoprotein and a member of the immunoglobulin superfamily of cell surface receptors. It is expressed at high levels on resting peripheral monocytes and dendritic cells and at very low density on resting B and T lymphocytes. CD86 expression is rapidly upregulated by B cell specific stimuli with peak expression at 18 to 42 hours after stimulation. CD86, along with CD80/B71, is an important accessory molecule in T cell co-stimulation via its interaction with
	CD28 and CD152/CTLA4. Since CD86 has rapid kinetics of induction, it is believed to be the
