Datasheet for ABIN6941290 Recombinant anti-TNFSF15 antibody

4 Images

Overview

Quantity:	100 µg
Target:	TNFSF15
Reactivity:	Human
Host:	Mouse
Antibody Type:	Recombinant Antibody
Clonality:	Monoclonal
Conjugate:	This TNFSF15 antibody is un-conjugated
Application:	Immunohistochemistry (IHC), Staining Methods (StM)

Product Details

Immunogen:	Recombinant human full-length VEGI protein
Clone:	RVEGI-1283
Isotype:	IgG1 kappa
Purification:	Purified by Protein A/G

Target Details

Target:	TNFSF15
Alternative Name:	TNFSF15 (TNFSF15 Products)
Background:	VEGI is an anti-angiogenic cytokine that belongs to tumor necrosis factor superfamily, member
	15 (TNFSF15). This protein is abundantly expressed in endothelial cells, but is not expressed in

	either B or T cells. The expression of this protein is inducible by TNF and IL-1 alpha. This
	cytokine is a ligand for receptor TNFRSF25 and decoy receptor TNFRSF21/DR6. It can activate
	NF-kappaB and MAP kinases, and acts as an autocrine factor to induce apoptosis in endothelial
	cells. This cytokine is also found to inhibit endothelial cell proliferation, and thus may function
	as an angiogenesis inhibitor. Reduced expression of VEGI has been reported as a marker of
	poor prognosis in breast cancer.
Molecular Weight:	22kDa
Gene ID:	9966
UniProt:	095150
Pathways:	Positive Regulation of Endopeptidase Activity, Autophagy

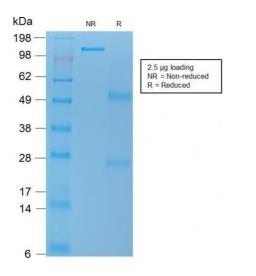

Application Details

Application Notes:	Positive Control: Endothelial cells. Colon, intestine, placenta, lung, liver, kidney, pancreas, spleen
	and prostate.
	Known Application: Immunohistochemistry (Formalin-fixed) (1-2 µg/mL for 30 minutes at
	RT)(Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM Tris with 1 mM
	EDTA, pH 9.0, for 10-20 min followed by cooling at RT for 20 minutes) Optimal dilution for a
	specific application should be determined.
Restrictions:	For Research Use only

Handling

Concentration:	200 µg/mL
Buffer:	10 mM PBS with 0.05 % BSA & 0.05 % azide.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	4 °C,-80 °C
Storage Comment:	Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.
Expiry Date:	24 months

SDS-PAGE

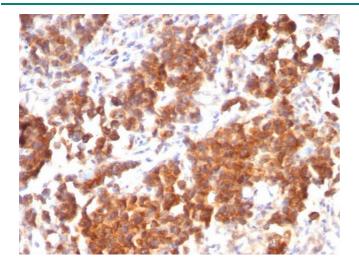

Image 1. SDS-PAGE Analysis Purified VEGI Mouse Recombinant Monoclonal Antibody (rVEGI /1283). Confirmation of Purity and Integrity of Antibody.

Protein Array

Image 2. Analysis of Protein Array containing more than 19,000 full-length human proteins using TNFS15 / VEGI Recombinant Mouse Monoclonal Antibody (rVEGI/1283). Zand S- Score: The Z-score represents the strength of a signal that a monoclonal antibody (MAb) (in combination with a fluorescently-tagged anti-IgG secondary antibody) produces when binding to a particular protein on the HuProtTM array. Z-scores are described in units of standard deviations (SD's) above the mean value of all signals generated on that array. If targets on HuProtTM are arranged in descending order of the Z-score, the S-score is the difference (also in units of SD's) between the Z-score. Sscore therefore represents the relative target specificity of a MAb to its intended target. A MAb is considered to specific to its intended target, if the MAb has an S-score of at least 2.5. For example, if a MAb binds to protein X with a Z-score of 43 and to protein Y with a Z-score of 14, then the S-score for the binding of that MAb to protein X is equal to 29.
