Datasheet for ABIN6941383  
**anti-EBV LMP1 antibody**

1 Image

### Overview

Quantity:	100 µg
Target:	EBV LMP1
Reactivity:	Epstein-Barr Virus (EBV)
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This EBV LMP1 antibody is un-conjugated
Application:	Western Blotting (WB), Coating (Coat), ELISA

### Product Details

Immunogen:	Recombinant fusion protein containing the sequence of bacterial beta-galactosidase and the carboxyl half of EBV-encoded LMP
Clone:	CS1
Isotype:	IgG1 kappa
Specificity:	This antibody is a mixture of four different monoclonal antibodies. This antibody is specific to 60 kDa latent membrane protein (LMP-1) encoded by the BNLF1 gene of the EBV. Each clone reacts with different epitopes on the hydrophilic C-terminus of the cytoplasmic domain of LMP-1. This antibody stains strongly with EBV-positive lymphoblastoid cell lines and EBV infected B cell immunoblasts in infectious mononucleosis. EBV, also designated human herpesvirus 4 (HHV-4), is a member of the herpesvirus family and is one of the most common human viruses. EBV infects B cells and, though often asymptomatic, it can cause infectious mononucleosis, a disease characterized by fatigue, fever, sore throat and muscle soreness.

## Product Details

---

Purification: Purified by Protein A/G

## Target Details

---

Target: EBV LMP1

Alternative Name: Epstein-Barr Virus (LMP-1) ([EBV LMP1 Products](#))

Target Type: Viral Protein

Molecular Weight: 60kDa

## Application Details

---

Application Notes: Positive Control: EBV-infected cells. Tissues.  
Known Application: ELISA (For coating, purchase antibody without BSA), Western Blot (1-2  $\mu$ g/mL), Optimal dilution for a specific application should be determined.

Restrictions: For Research Use only

## Handling

---

Concentration: 200  $\mu$ g/mL

Buffer: 10 mM PBS with 0.05 % BSA & 0.05 % azide.

Preservative: Sodium azide

Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: 4 °C, -80 °C

Storage Comment: Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.

Expiry Date: 24 months

### SDS-PAGE

**Image 1.** SDS-PAGE Analysis Purified EBV Mouse Monoclonal Antibody (CS1). Confirmation of Integrity and Purity of Antibody.
