Target:	Biotin
Reactivity:	Please inquire
Host:	Rabbit
Antibody Type:	Recombinant Antibody
Clonality:	Monoclonal
Conjugate:	This Biotin antibody is un-conjugated
Application:	Immunohistochemistry (IHC), Immunostaining (Ist)

#### Product Details

Immunogen:	Biotinylated sheep immunoglobulin
Clone:	BTN-2032R
Isotype:	IgG
Specificity:	<p>It recognizes both the free and protein-conjugated (either soluble or cell bound) form of biotin. This MAB is highly specific to biotin and shows no cross-reaction with other structurally related compounds. It has a very high affinity for biotin and is excellent for use in various amplification techniques. In some applications, localization of biotinylated probes with avidin produces unacceptably high background staining. Anti-biotin antibody may be substituted to decrease this noise.</p>
