Target Details

Background:	<p>Synonyms: 20kD calcium binding protein, CALT, caltractin, Caltractin isoform 1, CEN2, centrin, centrin, EF hand protein, 2, Centrin-2, Centrin2, CETN2, CETN2_HUMAN, EF hand protein 2, EF-hand protein.</p> <p>Background: Caltractin belongs to a family of calcium-binding proteins and is a structural component of the centrosome. The high level of conservation from algae to humans and its association with the centrosome suggested that caltractin plays a fundamental role in the structure and function of the microtubule-organizing center, possibly required for the proper duplication and segregation of the centrosome.
