Target Details		
Background:	<ul> <li>Synonyms: DDX33, DHX33_HUMAN, DEAD box polypeptide 33, DEAD/H (Asp Glu Ala Asp/His)</li> <li>box polypeptide 33, DEAH (Asp Glu Ala His) box polypeptide 33, DEAH box protein 33,</li> <li>FLJ21972.</li> <li>Background: This gene encodes a member of the DEAD box protein family. The DEAD box</li> <li>proteins are characterized by the conserved motif Asp-Glu-Ala-Asp (DEAD), are putative RNA</li> <li>helicases. They are implicated in a number of cellular processes involving alteration of RNA</li> <li>secondary structure such as translation initiation, nuclear and mitochondrial splicing, and</li> <li>ribosome and spliceosome assembly. Based on their distribution patterns, some members of</li> <li>this DEAD box protein family are believed to be involved in embryogenesis, spermatogenesis,</li> <li>and cellular growth and division. Alternative splicing results in multiple transcript variants.</li> <li>[provided by RefSeq, Dec 2010]</li> </ul>
