Target Details

Background: Synonyms: APOLMT, DNA-directed RNA polymerase, DNA-directed RNA polymerase mitochondrial, h-mtRPOL, mitochondrial, MTRNAP, MtRPOL, POLRMT, polymerase (RNA) mitochondrial (DNA directed), polymerase, RNA, mitochondrial, RPOM, RPOM_HUMAN.

Background: This gene encodes a mitochondrial DNA-directed RNA polymerase. The gene product is responsible for mitochondrial gene expression as well as for providing RNA primers for initiation of replication of the mitochondrial genome. Although this polypeptide has the same function as the three nuclear DNA-directed RNA polymerases, it is more closely related to RNA polymerases of phage and mitochondrial polymerases of lower eukaryotes.
