| Target: | MYADM |
| Alternative Name: | MYADM (MYADM Products) |
| Background: | Synonyms: MYADM, MYADM_HUMAN, myeloid associated differentiation marker, Myeloid |
| | upregulated protein, Myeloid-associated differentiation marker, Protein SB135. |
| | Background: Myeloid-associated differentiation marker (MYADM) is a member of the MAL |
| | family with the unique features of having eight transmembrane regions and a ubiquitous |
| | pattern of expression and of being found localized at the plasma membrane. MYADM has been |
| | found to be associated with the differentiation of hematopoietic cells or acute promyelocytic |
| | leukemia cells. MYADM could serve as a new marker for hematopoietic differentiation and is a |
| | target for diagnostic, prognostic and/or therapeutic interventions. |
