## Datasheet for ABIN6944755 anti-RBPJL antibody (AA 301-400) (HRP)

### Overview

|                      |  |
|----------------------|--|
| Quantity:            | 100 µL                                   |
| Target:              | RBPJL                                    |
| Binding Specificity: | AA 301-400                               |
| Reactivity:          | Mouse                                    |
| Host:                | Rabbit                                   |
| Clonality:           | Polyclonal                               |
| Conjugate:           | This RBPJL antibody is conjugated to HRP |
| Application:         | Western Blotting (WB), ELISA             |

### Product Details

|                       |   |
|-----------------------|---|
| Immunogen:            | KLH conjugated synthetic peptide derived from human RBPSUHL |
| Isotype:              | IgG   |
| Cross-Reactivity:     | Mouse   |
| Predicted Reactivity: | Human,Rat,Horse   |
| Purification:         | Purified by Protein A.                                      |

### Target Details

|                   |  |
|-------------------|--|
| Target:           | RBPJL  |
| Alternative Name: | RBPSUHL ( <a href="#">RBPJL Products</a> )   |
| Background:       | Synonyms: hCG_38385, RBP L, RBP-L, RBPL, RBPSUHL, Recombination signal binding protein |

## Target Details

for immunoglobulin kappa J region like, Recombining binding protein L, Recombining binding protein suppressor of hairless (Drosophila)-like, Recombining binding protein suppressor of hairless (Drosophila)-like, isoform CRA\_b, Recombining binding protein suppressor of hairless like protein, RP3 453C12.2 002, RP3 453C12.2 002, SUH, SUHL, Transcription factor RBP L, Transcription factor RBP-L, Transcription factor RBPL.

Background: This gene encodes a member of the suppressor of hairless protein family. A similar protein in mouse is a transcription factor that binds to DNA sequences almost identical to that bound by the Notch receptor signaling pathway transcription factor recombining binding protein J. The mouse protein has been shown to activate transcription in concert with Epstein-Barr virus nuclear antigen-2. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jul 2013]

Gene ID: 11317

UniProt: [Q9UBG7](#)

## Application Details

Application Notes: WB 1:300-5000

Restrictions: For Research Use only

## Handling

Format: Liquid

Concentration: 1 µg/µL

Buffer: Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.

Preservative: ProClin

Precaution of Use: This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.

Storage: -20 °C

Storage Comment: Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.

Expiry Date: 12 months
