## Target Details

Background:	<p>Synonyms: MGC23130, MID49, MIEF2, Mitochondrial dynamic protein MID49, Mitochondrial dynamic protein of 49 kDa, Mitochondrial elongation factor 2, Smith Magenis syndrome chromosome region candidate 7, Smith-Magenis syndrome chromosomal region candidate gene 7 protein.</p> <p>Background: This gene encodes an outer mitochondrial membrane protein that functions in the regulation of mitochondrial morphology. It can directly recruit the fission mediator dynamin-related protein 1 (Drp1) to the mitochondrial surface. The gene is located within the Smith-Magenis syndrome region on chromosome 17. Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Jun 2011]</p>
