Background: Synonyms: KIAA0453, vacuolar protein sorting 13 homolog D (*S. cerevisiae*), vacuolar protein sorting 13D, Vacuolar protein sorting-associated protein 13D, VP13D_HUMAN, vps13D.
Background: This gene encodes a protein belonging to the vacuolar-protein-sorting-13 gene family. In yeast, vacuolar-protein-sorting-13 proteins are involved in trafficking of membrane proteins between the trans-Golgi network and the prevacuolar compartment. While several transcript variants may exist for this gene, the full-length natures of only two have been described to date. These two represent the major variants of this gene and encode distinct isoforms. [provided by RefSeq, Jul 2008]
