Target Details

Background:	<p>Synonyms: D3S1363E, OTTHUMP00000164119, P18, VHL associated KRAB A domain containing protein, VHLaK, Zinc finger protein 166, Zinc finger protein 197, Zinc finger protein 20, Zinc finger protein with KRAB and SCAN domains 9, ZKSCAN9, ZNF166, ZNF20.</p> <p>Background: This gene product belongs to the zinc finger protein superfamily, members of which are regulatory proteins characterized by nucleic acid-binding zinc finger domains. The encoded protein contains 20 tandemly arrayed C2H2-type zinc fingers, a Kruppel-associated box (KRAB) domain, and a SCAN box. This transcript turns over rapidly and contains 3' UTR AUUUA motifs, which are often a hallmark of rapid turnover. It is overexpressed in some thyroid papillary carcinomas. This gene is located in a cluster of zinc finger genes at 3p21. Two alternatively spliced transcripts encoding different isoforms have been described. [provided by RefSeq, Jul 2008]</p>
