Datasheet for ABIN6953300 SARS-CoV-2 Spike Protein (D614G, Super Stable Trimer) (His tag,AVI tag,Biotin)

4 Images

Overview

Quantity:	200 µg
Target:	SARS-CoV-2 Spike
Protein Characteristics:	D614G, Super Stable Trimer
Origin:	SARS Coronavirus-2 (SARS-CoV-2)
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SARS-CoV-2 Spike protein is labelled with His tag,AVI tag,Biotin.
Application:	ELISA

Product Details

Purpose:	Biotinylated SARS-CoV-2 S protein (D614G), His,Avitag™, Super stable trimer (MALS verified)
Sequence:	AA 16-1213
Specificity:	Biotinylation of this product is performed using Avitag™ technology. Briefly, the single lysine residue in the Avitag is enzymatically labeled with biotin.
Characteristics:	 Biotinylated SARS-CoV-2 S protein (D614G), His,Avitag, Super stable trimer is the ectodomain of SARS-CoV-2 S protein that contains AA Val 16 - Pro 1213 (Accession # QHD43416.1(D614G) and D614G mutation, which has become increasingly common in SARS-CoV-2 viruses from around the world . The recombinant protein is expressed from human 293 cells (HEK293) with T4 fibritin trimerization motif and a polyhistidine tag at the C-terminus. Proline substitutions (F817P, A892P, A899P, A942P, K986P, V987P) and alanine substitutions

Product Details

	(R683A and R685A) are introduced to stabilize the trimeric prefusion state of SARS-CoV-2 S
	protein and abolish the furin cleavage site, respectively.
	It is the biotinlynated form of SARS-CoV-2 S protein (D614G), His Tag, Super stable trimer
	(MALS verified) SPN-C52H3).
Purity:	> 95 % as determined by SDS-PAGE. > 90 % as determined by SEC-MALS.
Sterility:	0.22 µm filtered
Endotoxin Level:	Less than 1.0 EU per μ g by the LAL method.
Target Details	
Target:	SARS-CoV-2 Spike
Abstract:	SARS-CoV-2 Spike Products
Target Type:	Viral Protein
Background:	It's been reported that Coronavirus can infect the human respiratory epithelial cells through
	interaction with the human ACE2 receptor. The spike protein is a large type I transmembrane
	protein containing two subunits, S1 and S2. S1 mainly contains a receptor binding domain
	(RBD), which is responsible for recognizing the cell surface receptor. S2 contains basic
	elements needed for the membrane fusion.The S protein plays key parts in the induction of
	neutralizing-antibody and T-cell responses, as well as protective immunity.
Molecular Weight:	139.7 kDa

Application Details

Application Notes:	Optimal working dilution should be determined by the investigator.
Comment:	Ready-to-use AvitagTM biotinylated protein:
	The product is exclusively produced using the AvitagTM technology. Briefly, a unique 15 amino
	acid peptide, the Avi tag, is introduced into the recombinant protein during expression vector
	construction. The single lysine residue in the Avi tag is enzymatically biotinylated by the E. Coli
	biotin ligase BirA.
	This single-point enzymatic labeling technique brings many advantages for commonly used
	binding assays. The biotinylation happens on the lysine residue of Avi tag, and therefore does
	NOT interfere with the target protein's natural binding activities. In addition, when immobilized
	on an avidin-coated surface, the protein orientation is uniform because the position of the Avi

	tag in the protein is precisely controlled.
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Buffer:	PBS
Storage:	-20 °C,-80 °C
Storage Comment:	For long term storage, the product should be stored at lyophilized state at -20°C or lower. This product is stable after storage at: -20°C to -70°C for 12 months in lyophilized state 70°C for 3 months under sterile conditions after reconstitution.
Expiry Date:	12 months
