Datasheet for ABIN6971425 anti-BAZ2A antibody (N-Term)

Image

Overview

Quantity:	100 µL
Target:	BAZ2A
Binding Specificity:	N-Term
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Application:	Western Blotting (WB), Immunofluorescence (IF)

Product Details

Immunogen:	This antibody was raised against a peptide within the N-terminal region of human BAZ2A.
lsotype:	lgG
Characteristics:	BAZ2A (Bromodomain Adjacent To Zinc Finger Domain, 2A) is an essential component of the
	NoRC (nucleolar remodeling complex) complex, a complex that mediates silencing of a fraction
	of rDNA by recruiting histone-modifying enzymes and DNA methyltransferases, leading to
	heterochromatin formation and transcriptional silencing. In the complex, it plays a central role
	by being recruited to rDNA and by targeting chromatin modifying enzymes such as HDAC1,
	leading to repress RNA polymerase I transcription. Recruited to rDNA via its interaction with
	TTF1 and its ability to recognize and bind histone H4 acetylated on 'Lys-16' (H4K16ac), leading
	to deacetylation of H4K5ac, H4K8ac, H4K12ac but not H4K16ac. Specifically binds pRNAs, 150-
	250 nucleotide RNAs that are complementary in sequence to the rDNA promoter, pRNA-binding
	is required for heterochromatin formation and rDNA silencing (By similarity). BAZ2A antibody
	(pAb) was raised in a Rabbit host. It has been validated for use in Immunofluorescence and

Product Details			
	Western blot, it has been shown to react with Human samples.		
Purification:	Affinity Purified		
Target Details			
Target:	BAZ2A		
Alternative Name:	BAZ2A (BAZ2A Products)		
Molecular Weight:	270 kDa		
NCBI Accession:	NP_038477		
Application Details			
Application Notes:	Optimal working dilution should be determined by the investigator.		
Restrictions:	For Research Use only		
Handling			
Buffer:	Purified IgG in PBS with 30 % glycerol and 0.035 % sodium azide.		
Preservative:	Sodium azide		
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.		
Storage:	-20 °C		
Storage Comment:	Avoid repeated freeze/thaw cycles by aliquoting items into single-use fractions for storage at - 20°C for up to 2 years. Keep all reagents on ice when not in storage.
