Datasheet for ABIN6972477 anti-PAF1/PD2 antibody

Image

Overview

Quantity:	100 µL
Target:	PAF1/PD2 (PAF1)
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Application:	Western Blotting (WB)

Product Details

Immunogen:	This antibody was raised against a peptide within human PAF1.
Isotype:	lgG
Characteristics:	PAF1 (RNA polymerase II-associated factor 1 homolog) is a component of the PAF1 complex
	(PAF1C) which has multiple functions during transcription by RNA polymerase II and is
	implicated in regulation of development and maintenance of embryonic stem cell pluripotency.
	PAF1C associates with RNA polymerase II through interaction with POLR2A CTD non-
	phosphorylated and 'Ser-2'- and 'Ser-5'-phosphorylated forms and is involved in transcriptional
	elongation, acting both indepentently and synergistically with TCEA1 and in cooperation with
	the DSIF complex and HTATSF1. PAF1C is required for transcription of Hox and Wnt target
	genes. PAF1C is involved in hematopoiesis and stimulates transcriptional activity of
	KMT2A/MLL1, it promotes leukemogenesis through association with KMT2A/MLL1-rearranged
	oncoproteins, such as KMT2A/MLL1-MLLT3/AF9 and KMT2A/MLL1-MLLT1/ENL. PAF1C is
	involved in histone modifications such as ubiquitination of histone H2B and methylation on
	histone H3 'Lys-4' (H3K4me3). PAF1C recruits the RNF20/40 E3 ubiquitin-protein ligase

Product Details

Human samples.
in a Rabbit host. It has been validated for use in Western blot, it has been shown to react with
mRNA precursors. Has oncogenic activity in vivo and in vitro. PAF1 antibody (pAb) was raised
PAF1C with the RNF20/40 E3 ubiquitin-protein ligase complex. Involved in polyadenylation of
PAF1C associates with viral NS1 protein, thereby regulating gene transcription. Connects
association with cleavage and poly(A) factors. In case of infection by influenza A strain H3N2,
be coupled to transcription. PAF1C is involved in mRNA 3' end formation probably through
of 'Lys-120' of histone H2B (H2BK120ub1), UB2A/B-mediated H2B ubiquitination is proposed to
complex and the E2 enzyme UBE2A or UBE2B to chromatin which mediate monoubiquitination

Purification:

Affinity Purified

Target Details

Target:	PAF1/PD2 (PAF1)
Alternative Name:	PAF1 (PAF1 Products)
Molecular Weight:	65 kDa
NCBI Accession:	NP_061961
Pathways:	Cellular Response to Molecule of Bacterial Origin, Stem Cell Maintenance
Application Details	
Application Notes:	Optimal working dilution should be determined by the investigator.
Restrictions:	For Research Use only
Handling	
Buffer:	Purified IgG in PBS with 30 % glycerol and 0.035 % sodium azide.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which
	should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Avoid repeated freeze/thaw cycles by aliquoting items into single-use fractions for storage at - 20°C for up to 2 years. Keep all reagents on ice when not in storage.
