## Target Details

Background:	Synonyms: Glycine receptor subunit beta, GLRB, Glycine receptor 58 kDa subunit
	Background: Glycine receptors are ligand-gated chloride channels. GLRB does not form ligand-
	gated ion channels by itself, but is part of heteromeric ligand-gated chloride channels. Channel
	opening is triggered by extracellular glycine (PubMed:8717357, PubMed:15302677,
	PubMed:16144831, PubMed:22715885, PubMed:25445488, PubMed:11929858,
	PubMed:23238346). Heteropentameric channels composed of GLRB and GLRA1 are activated
	by lower glycine levels than homopentameric GLRA1 (PubMed:8717357). Plays an important
	role in the down-regulation of neuronal excitability (PubMed:11929858, PubMed:23238346).
	Contributes to the generation of inhibitory postsynaptic currents (PubMed:25445488).
