Target Details

Target:	SIGLEC11
Alternative Name:	SIGLEC11 (SIGLEC11 Products)
Background:	Synonyms: sialic acid binding Ig like lectin 11, sialic acid binding lectin 11, Siglec 11,

Target Details

SIG11_HUMAN.

Background: Putative adhesion molecule that mediates sialic-acid dependent binding to cells.

Preferentially binds to alpha-2,8-linked sialic acid. The sialic acid recognition site may be masked by cis interactions with sialic acids on the same cell surface. In the immune response, may act as an inhibitory receptor upon ligand induced tyrosine phosphorylation by recruiting cytoplasmic phosphatase(s) via their SH2 domain(s) that block signal transduction through dephosphorylation of signaling molecules.
