| Target: | TAF1A |
| Alternative Name: | TAF1A (TAF1A Products) |
| Background: | Synonyms: TATA box-binding protein-associated factor RNA polymerase I subunit A, TAF1A, |

Target Details

RNA polymerase I-specific TBP-associated factor 48 kDa, TAFI48, BP-associated factor 1A, Transcription factor SL1, Transcription initiation factor SL1/TIF-IB subunit A

Background: Component of the transcription factor SL1/TIF-IB complex, which is involved in the assembly of the PIC (preinitiation complex) during RNA polymerase I-dependent transcription. The rate of PIC formation probably is primarily dependent on the rate of association of SL1/TIF-IB with the rDNA promoter. SL1/TIF-IB is involved in stabilization of nucleolar transcription factor 1/UBTF on rDNA. Formation of SL1/TIF-IB excludes the association of TBP with TFIID subunits.
