Target Details

Background:	Synonyms: Egf like module containing mucin like hormone receptor like 3, Egf like module containing mucin like receptor 3, EMR3_HUMAN, EGF like module containing mucin like receptor EMR3, EMR 3. Background: This gene encodes a member of the class B seven-span transmembrane (TM7) receptor family expressed predominantly by cells of the immune system. Family members are	
	characterized by an extended extracellular region with a variable number of N-terminal	
	epidermal growth factor (EGF)-like domains coupled to a TM7 domain via a mucin-like spacer domain. This gene is closely linked to the gene encoding egf-like molecule containing mucin-	
	like hormone receptor 2 on chromosome 19. This protein may play a role in myeloid-myeloid	
	interactions during immune and inflammatory responses. [provided by RefSeq, Jul 2008]
