Target Details

Target Details

Background:	Synonyms: Aldosterone receptor, MCR, MGC133092, MLR, MR, NR3 C2, NR3C2, NR3C2 protein, Nuclear receptor subfamily 3 group C member 2, MCR_HUMAN. Background: Receptor for both mineralocorticoids (MC) such as aldosterone and glucocorticoids (GC) such as corticosterone or cortisol. Binds to mineralocorticoid response elements (MRE) and transactivates target genes. The effect of MC is to increase ion and water transport and thus raise extracellular fluid volume and blood pressure and lower potassium levels.
