Target Details

Target:	DLG4
Alternative Name:	PSD95 (DLG4 Products)
Background:	Synonyms: PSD95, SAP9, SAP-9, Disks large homolog 4, Postsynaptic density protein 95, PSD-

Target Details

95, Synapse-associated protein 9, DLG4

Background: Interacts with the cytoplasmic tail of NMDA receptor subunits and shaker-type potassium channels. Required for synaptic plasticity associated with NMDA receptor signaling. Overexpression or depletion of DLG4 changes the ratio of excitatory to inhibitory synapses in hippocampal neurons. May reduce the amplitude of ASIC3 acid-evoked currents by retaining the channel intracellularly. May regulate the intracellular trafficking of ADR1B (By similarity).
