Target Details

Background: Synonyms: 14-3-3, mitochondrial import stimulation factor L subunit, protein kinase C inhibitor protein-1, Protein kinase C inhibitor protein1, Tyrosine 3 monooxygenase/tryptophan 5 monooxygenase activation protein, tyrosine 3/tryptophan 5 -monooxygenase activation protein. Background: Adapter protein implicated in the regulation of a large spectrum of both general and specialized signaling pathway. Binds to a large number of partners, usually by recognition of a phosphoserine or phosphothreonine motif. Binding generally results in the modulation of the activity of the binding partner.
