## Target Details

Alternative Name:	VPS4B ( <a href="#">vps4b Products</a> )
Background:	<p>Synonyms: 8030489C12Rik, Cell migration inducing 1, Cell migration-inducing gene 1 protein, MGC116271, MIG1, Protein SKD1, Skd1, SKD1B, Suppressor of K(+) transport growth defect 1, Suppressor of K+ transport defect 1, Vacuolar protein sorting 4 homolog B (S. cerevisiae), Vacuolar protein sorting 4 homolog B, Vacuolar protein sorting 4b, Vacuolar protein sorting-associated protein 4B, Vacuolar protein sorting-associated protein 4B, VPS4 2, VPS42, Vps4b, VPS4B_HUMAN.</p> <p>Background: Involved in late steps of the endosomal multivesicular bodies (MVB) pathway. Recognizes membrane-associated ESCRT-III assemblies and catalyzes their disassembly, possibly in combination with membrane fission. Redistributes the ESCRT-III components to the cytoplasm for further rounds of MVB sorting. MVBs contain intraluminal vesicles (ILVs) that are generated by invagination and scission from the limiting membrane of the endosome and mostly are delivered to lysosomes enabling degradation of membrane proteins, such as stimulated growth factor receptors, lysosomal enzymes and lipids. In conjunction with the ESCRT machinery also appears to function in topologically equivalent membrane fission events, such as the terminal stages of cytokinesis and enveloped virus budding (HIV-1 and other lentiviruses).</p>
