

Datasheet for ABIN6990159 anti-SARS-CoV-2 Spike S2 antibody (C-Term) (Biotin)

Overview

Overview	
Quantity:	0.1 mg
Target:	SARS-CoV-2 Spike S2
Binding Specificity:	AA 1130-1180, C-Term
Reactivity:	SARS Coronavirus-2 (SARS-CoV-2)
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This SARS-CoV-2 Spike S2 antibody is conjugated to Biotin
Application:	Please inquire
Product Details	
Immunogen:	Anti-SARS-CoV-2 (COVID-19) Spike S2 antibody (biotin) was raised against a peptide
	corresponding to 16 amino acids near the carboxy terminus of SARS-CoV-2 (COVID-19) Spike
	glycoprotein. The immunogen is located within 1130-1180 amino acids of SARS-CoV-2 (COVID-
	19) Spike protein.
Isotype:	lgG
Purification:	SARS-CoV-2 (COVID-19) Spike Antibody (biotin) is affinity chromatography purified via peptide
	column.
Target Details	
Target:	SARS-CoV-2 Spike S2
Abstract:	SARS-CoV-2 Spike S2 Products

Target Details		
Target Type:	Viral Protein	
Background:	Coronavirus disease 2019 (COVID-19), formerly known as 2019-nCoV acute respiratory disease,	
	is an infectious disease caused by SARS-CoV-2, a virus closely related to the SARS virus (1).	
	The disease is the cause of the 2019-20 coronavirus outbreak (2). The structure of 2019-nCoV	
	consists of the following: a Spike protein (S), hemagglutinin-esterease dimer (HE), a membrane	
	glycoprotein (M), an envelope protein (E) a nucleoclapid protein (N) and RNA. Coronavirus	
	invades cells through Spike (S) glycoproteins, a class I fusion protein. It is the major viral	
	surface protein that coronavirus uses to bind to the human cell surface receptor. It also	
	mediates the fusion of host and viral cell membrane, allowing the virus to enter human cells	
	and begin infection (3). The spike protein is the major target for neutralizing antibodies and	
	vaccine development (4). The protein modeling suggests that there is strong interaction	
	between Spike protein receptor-binding domain and its host receptor angiotensin-converting	
	enzyme 2 (ACE2), which regulate both the cross-species and human-to-human transmissions	
	of COVID-19 (5). The recent study has shown that the SARS-CoV-2 spike protein binds ACE2	
	with higher affinity than SARS-CoV spike protein (6).	
Gene ID:	43740568	
Application Details		
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Concentration:	1 mg/mL	
Buffer:	SARS-CoV-2 (COVID-19) Spike Antibody (biotin) is supplied in PBS containing 0.02 % sodium	
	azide.	
Preservative:	Sodium azide	
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which	
	should be handled by trained staff only.	
Storage:	-20 °C,4 °C	
Storage Comment:	SARS-CoV-2 (COVID-19) Spike antibody (biotin) can be stored at 4°C for three months and -	
	20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated
