Overview

Purification:

Target:

Target Details

CIDEB

# anti-CIDEB antibody (C-Term)

Quantity:	0.1 mg
Target:	CIDEB
Binding Specificity:	C-Term
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This CIDEB antibody is un-conjugated
Application:	ELISA, Western Blotting (WB), Immunofluorescence (IF), Immunohistochemistry (Paraffinembedded Sections) (IHC (p))
Product Details	
Immunogen:	CIDE-B antibody was raised against a peptide corresponding to 15 amino acids near the carboxy terminus of human CIDE-B. The immunogen is located within the last 50 amino acids of CIDE-B.
Isotype:	IgG
Specificity:	CIDE-B antibody has no cross activity to CIDE-A.

Alternative Name: CIDE-B (CIDEB Products)

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn

CIDE-B Antibody is affinity chromatography purified via peptide column.

#### Target Details

Backo	round:
Dacku	n Ouriu.

CIDE-B Antibody: Apoptosis is related to many diseases and induced by a family of cell death receptors and their ligands. Cell death signals are transduced by death domain containing adapter molecules and members of the caspase family of proteases. These death signals finally cause the degradation of chromosomal DNA by activated DNase. DFF45/ICAD has been identified as inhibitor of caspase activated DNase DFF40/CAD. DFF45 related proteins CIDE-A and CIDE-B (for cell death-inducing DFF-like effector A and B) were recently identified. CIDE contains a new type of domain termed CIDE-N, which has high homology with the regulatory domains of DFF45/ICAD and DFF40/CAD. Expression of CIDE-B induces apoptosis, which is inhibited by DFF45. CIDE-B is a DFF45-inhibitable effector that promotes cell death and DNA fragmentation. CIDE-B is expressed mainly in liver and at lower levels in spleen, kidney, peripheral blood lymphocytes and bone marrow.

Gene ID:

27141

UniProt:

Q9UHD4

## **Application Details**

Application Notes:

CIDE-B antibody can be used for detection of CIDE-B by Western blot at 0.5 - 2  $\mu$ ,g/mL. Antibody can also be used for immunohistochemistry starting at 5  $\mu$ ,g/mL. For immunofluorescence start at 20  $\mu$ ,g/mL.

Antibody validated: Western Blot in mouse samples, Immunohistochemistry in human samples and Immunofluorescence in human samples. All other applications and species not yet tested.

Restrictions:

For Research Use only

## Handling

Format:	Liquid
Concentration:	1 mg/mL
Buffer:	CIDE-B Antibody is supplied in PBS containing 0.02 % sodium azide.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	-20 °C,4 °C
Storage Comment:	CIDE-B antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As

with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.
