Datasheet for ABIN6990901 **anti-VPS53 antibody (AA 390-440)**

Overview

Quantity:	0.1 mg
Target:	VPS53
Binding Specificity:	AA 390-440
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This VPS53 antibody is un-conjugated
Application:	Western Blotting (WB), ELISA

Product Details

Immunogen:	VPS53 antibody was raised against a 18 amino acid synthetic peptide from near the center of human VPS53. The immunogen is located within amino acids 390 - 440 of VPS53.
Isotype:	IgG
Purification:	VPS53 Antibody is affinity chromatography purified via peptide column.

Target Details

Target:	VPS53
Alternative Name:	VPS53 (VPS53 Products)
Background:	VPS53 Antibody: The sorting of acid hydrolases to lysosomes rely on mannose 6-phosphate receptors that cycle between the trans-Golgi network (TGN) and endosomes. The maintenance of this cycle requires the function of the mammalian Golgi-associated retrograde protein

Target Details

(GARP) complex which is composed of three subunits: VPS52, VPS53, and VPS54. Depletion of any of these three proteins, such as by RNAi, impairs the retrograde transport of multiple TGN proteins. VPS53 was identified as an HIV dependency factor (HDF) and plays a role in viral entry to the cell, suggesting that VPS53 may be an important drug target in HIV treatment. At least five isoforms of VPS53 are known to exist.

Gene ID: 55275

UniProt: [Q5VIR6](#)

Application Details

Application Notes: VPS53 antibody can be used for detection of VPS53 by Western blot at 0.5 - 1 µg/mL.

Antibody validated: Western Blot in human samples. All other applications and species not yet tested.

Restrictions: For Research Use only

Handling

Format: Liquid

Concentration: 1 mg/mL

Buffer: VPS53 Antibody is supplied in PBS containing 0.02 % sodium azide.

Preservative: Sodium azide

Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: -20 °C, 4 °C

Storage Comment: VPS53 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.
