Datasheet for ABIN6991148 anti-Influenza A Virus Neuraminidase antibody (AA 50-100)

Overview

Quantity:	0.1 mg
Target:	Influenza A Virus Neuraminidase (NA)
Binding Specificity:	AA 50-100
Reactivity:	Influenza A Virus H1N1
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Influenza A Virus Neuraminidase antibody is un-conjugated
Application:	ELISA
Product Details	
FIUUULI DELAIIS	
Immunogen:	Neuraminidase antibody was raised against a synthetic peptide from the novel swine influenza
	Neuraminidase antibody was raised against a synthetic peptide from the novel swine influenza Neuraminidase protein. This antibody is a cognate pair with product ABIN6991147. The
	Neuraminidase protein. This antibody is a cognate pair with product ABIN6991147. The
Immunogen:	Neuraminidase protein. This antibody is a cognate pair with product ABIN6991147. The immunogen is located within amino acids 50 - 100 of Swine H1N1 Neuraminidase.
Immunogen: Isotype:	Neuraminidase protein. This antibody is a cognate pair with product ABIN6991147. The immunogen is located within amino acids 50 - 100 of Swine H1N1 Neuraminidase.
Immunogen: Isotype:	Neuraminidase protein. This antibody is a cognate pair with product ABIN6991147. The immunogen is located within amino acids 50 - 100 of Swine H1N1 Neuraminidase. IgG This antibody is specific for the novel swine influenza Neuraminidase and will not recognize the
Immunogen: Isotype:	Neuraminidase protein. This antibody is a cognate pair with product ABIN6991147. The immunogen is located within amino acids 50 - 100 of Swine H1N1 Neuraminidase. IgG This antibody is specific for the novel swine influenza Neuraminidase and will not recognize the corresponding Neuraminidase sequence from the seasonal H1N1 influenza

Target Details	
Target:	Influenza A Virus Neuraminidase (NA)
Alternative Name:	Swine H1N1 Neuraminidase (NA Products)
Target Type:	Influenza Protein
Background:	Swine H1N1 Neuraminidase Antibody: Influenza A virus is a major public health threat, killing more than 30, 000 people per year in the USA. In early 2009, a novel swine-origin influenza A (H1N1) virus was identified in specimens obtained from patients in Mexico and the United States. The virus spread quickly around the world and on June 11, 2009, the World Health Organization declared it a pandemic. Influenza A virus has one of sixteen possible Hemagglutinin (HA) surface proteins and one of nine possible Neuraminidase (NA) surface proteins. The Hemagglutinin protein facilitates viral attachment while Neuraminidase is involved in viral release. These proteins also elicit immune responses that prevent infection or independently reduce viral replication. The genetic make-up of this swine flu virus is unlike any other: it is an H1N1 strain that combines a triple assortment first identified in 1998 including human, swine, and avian influenza with two new pig H3N2 virus genes from Eurasia, themselves of recent human origin. The distinct antigenic properties of the new swine influenza virus compared with seasonal influenza A (H1N1) virus suggest that human immunity against new swine influenza virus is limited, although the age distribution of reported cases suggests some degree of protection in older age groups.
UniProt:	C4AL28
Application Details	
Application Notes:	Neuraminidase antibody can be used for the detection of the Neuraminidase protein from the H1N1 strain of swine influenza A in ELISA. It will detect 2 ng of free peptide at 1 μ ,g/mL
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 mg/mL
Buffer:	Swine H1N1 Neuraminidase Antibody is supplied in PBS containing 0.02 % sodium azide.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Handling

Storage:	-20 °C,4 °C
Storage Comment:	Swine H1N1 Neuraminidase antibody can be stored at 4°C for three months and -20°C, stable
	for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw
	cycles. Antibodies should not be exposed to prolonged high temperatures.
