

## Datasheet for ABIN6991450

## anti-ZNF687 antibody (N-Term)

## Overview

| Quantity:            | 0.1 mg  |
|----------------------|---|
| Target:              | ZNF687  |
| Binding Specificity: | N-Term  |
| Reactivity:          | Human   |
| Host:                | Rabbit  |
| Clonality:           | Polyclonal  |
| Conjugate:           | This ZNF687 antibody is un-conjugated   |
| Application:         | ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p))                            |
| Product Details      |   |
| Immunogen:           | ZNF687 antibody was raised against a 17 amino acid synthetic peptide near the amino           |
|                      | terminus of human ZNF687. The immunogen is located within the first 50 amino acids of         |
|                      | ZNF687.   |
| Isotype:             | IgG   |
| Specificity:         | ZNF687 antibody is human specific. At least three isoforms of ZNF687 are known to exist, this |
|                      | antibody will detect the the two largest isoforms.  |
| Purification:        | ZNF687 Antibody is affinity chromatography purified via peptide column.                       |
| Target Details       |   |
| Target:              | ZNF687  |
| Alternative Name:    | ZNF687 (ZNF687 Products)  |
|                      |   |

## **Target Details**

| -                   |  |
|---------------------|--|
| Background:         | ZNF687 Antibody: The zinc finger protein 687 (ZNF687) was initially identified as a            |
|                     | translocation partner gene with RUNX1 in patients with acute myeloid leukemia (AML). Little is |
|                     | known of the function of the ZNF687 protein, but it has been shown to weakly interact with the |
|                     | Ring1/Rnf2 RING finger protein member of the Polycomb group of proteins, suggesting it may     |
|                     | be involved in the chromatin-modifying complexes essential for embryonic development and       |
|                     | stem cell renewal. Other evidence suggests that ZNF687 may be part of a transcriptional        |
|                     | network that also includes ZNF592 and ZMYMD8.  |
| Gene ID:            | 57592  |
| NCBI Accession:     | NP_065883  |
| UniProt:            | Q8N1G0   |
| Application Details |  |
| Application Notes:  | ZNF687 antibody can be used for detection of ZNF687 by immunohistochemistry at 5 μ,g/mL.       |
|                     | Antibody validated: Immunohistochemistry in human samples. All other applications and          |
|                     | species not yet tested.  |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Liquid   |
| Concentration:      | 1 mg/mL  |
| Buffer:             | ZNF687 Antibody is supplied in PBS containing 0.02 % sodium azide.                             |
| Preservative:       | Sodium azide   |
| Precaution of Use:  | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which                  |
|                     | should be handled by trained staff only.   |
| Storage:            | -20 °C,4 °C  |
| Storage Comment:    | ZNF687 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. A  |
|                     | with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies shou |
|                     | not be exposed to prolonged high temperatures.   |
|                     |  |
