

Datasheet for ABIN6991451 anti-SLC39A1 antibody (N-Term)

Overview

Overview	
Quantity:	0.1 mg
Target:	SLC39A1
Binding Specificity:	AA 40-90, N-Term
Reactivity:	Human, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This SLC39A1 antibody is un-conjugated
Application:	ELISA, Western Blotting (WB), Immunofluorescence (IF), Immunohistochemistry (Paraffinembedded Sections) (IHC (p))
Product Details	
Immunogen:	ZIP1 antibody was raised against a 16 amino acid synthetic peptide near the amino terminus of human ZIP1. The immunogen is located within amino acids 40 - 90 of ZIP1.
Isotype:	IgG
Specificity:	At least two isoforms of ZIP1 are known to exist, this antibody will detect both isoforms. ZIP1 antibody is predicted not to cross-react with other ZIP family proteins.
Purification:	ZIP1 Antibody is affinity chromatography purified via peptide column.
Target Details	
Target:	SLC39A1
Alternative Name:	ZIP1 (SLC39A1 Products)

Target Details

Background: ZIP1 Antibody: ZIP1, also known as ZIRTL (zinc-iron regulated transporter-like), is the first mammalian member of a family of divalent ion transporters. Zinc is an essential ion for cells and plays significant roles in the growth, development, and differentiation. ZIP1 expression is markedly downregulated in a number of cancerous tissues and is thought to function as a tumor suppressor gene in prostate cancer. More recent studies have shown that overexpression of ZIP1 and concomitant increased levels of intracellular zinc in PC3 cells cause a significant inhibition of NF-kB, leading to down-regulation of the antispoptotic protein Bol-2, Bcl-XL, and the apoptosis inhibitor XIAP, reducing the malignant potential of prostate cancer cells in vitro and in vivo. Molecular Weight: Predicted: 13, 36 kDa Observed: 38 kDa Cene ID: 27173 NCBI Accession: NP_055252 UniProt: O9NY26 Pathways: Autophagy Application Notes: ZIP1 antibody can be used for detection of ZIP1 by Western blot at 1 - 2 µg/mL. Antibody can also be used for immunohistochemistry starting at 2.5 µg/mL. For immunofluorescence start at 20 µg/mL. Antibody validated: Western Blot in mouse samples, immunohistochemistry in human samples and immunofluorescence in human samples. All other applications and species not yet tested. Restrictions: For Research Use only Handling Format: Liquid Concentration: Liquid Concentration: ZIP1 Antibody is supplied in PBS containing 0.02 % sodium azide. Preservative: Sodium azide		
tumor suppressor gene in prostate cancer. More recent studies have shown that overexpression of ZIP1 and concomitant increased levels of intracellular zinc in PC-3 cells cause a significant inhibition of NF-k,B, leading to down-regulation of the antiapoptotic protein Bcl-2, Bcl-XL, and the apoptosis inhibitor XIAP, reducing the malignant potential of prostate cancer cells in vitro and in vivo. Molecular Weight: Predicted: 13, 36 kDa Observed: 38 kDa Ophrotic 27173 NCBI Accession: NP-055252 UniProt: Q9NY26 Pathways: Autophagy Application Details ZiP1 antibody can be used for detection of ZiP1 by Western blot at 1 - 2 µ.g/mL. Antibody can also be used for immunohistochemistry starting at 2.5 µ.g/mL. For immunofluorescence start at 20 µ.g/mL. Antibody validated: Western Blot in mouse samples. Immunohistochemistry in human samples and Immunofluorescence in human samples. All other applications and species not yet tested. Restrictions: For Research Use only Handling Format: Liquid Concentration: 1 mg/mL Buffer: ZiP1 Antibody is supplied in PBS containing 0.02 % sodium azide. Format: Concentration: 1 mg/mL Buffer: ZIP1 Antibody is supplied in PBS containing 0.02 % sodium azide.	Restrictions:	For Research Use only
Concentration: 1 mg/mL Buffer: ZIP1 Antibody is supplied in PBS containing 0.02 % sodium azide.	Handling	
Buffer: ZIP1 Antibody is supplied in PBS containing 0.02 % sodium azide.	Format:	Liquid
, II	Concentration:	1 mg/mL
Preservative: Sodium azide	Buffer:	ZIP1 Antibody is supplied in PBS containing 0.02 % sodium azide.
	Preservative:	Sodium azide

Handling

Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	-20 °C,4 °C
Storage Comment:	ZIP1 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.
