Product Details

Immunogen:	DISP1 antibody was raised against a 16 amino acid synthetic peptide near the amino terminus of human DISP1. The immunogen is located within amino acids 20 - 70 of DISP1.
Isotype:	IgG
Specificity:	At least two isoforms of DISP1 are known to exist, this antibody will detect both isoforms. DISP1 antibody is predicted to not cross-react with EMX1.
Purification:	DISP1 Antibody is affinity chromatography purified via peptide column.

Target Details

Target:	DISP1
Alternative Name:	DISP1 (DISP1 Products)

Target Details

Background:	DISP1 Antibody: DISP1 is the mammalian homolog of the Drosophila Dispatched segment-polarity gene and a key regulator of the Hedgehog (Hh) signaling pathway during embryonic development. DISP1 is required to move Shh from site of synthesis during embryogenesis, mutations in the gene result in lethality at mid-gestation and prevents specification of ventral cell types in the neural tube. Recent results have shown that DISP1 mediates the basolateral secretion of Shh and regulates growth of mammalian long bones through the control of Ihh.
