Target Details

Target:	GUCY2C
Alternative Name:	GUCY2C (GUCY2C Products)
Background:	GUCY2C (Guanylyl Cyclase C), also known as heat-stable enterotoxin receptor, is a type I
	transmembrane protein of the guanylate cyclase (gc) family that signal by producing cGMP.
	Guanylate cyclase C (GUCY2C) and its hormones guanylin and uroguanylin have recently
	emerged as one paracrine axis defending intestinal mucosal integrity against mutational,

chemical, and inflammatory injury. GUCY2C murine CAR-T cells recognized and killed human colorectal cancer cells endogenously expressing GUCY2C. Thus, we have identified a human GUCY2C-specific CAR-T cell therapy approach that may be developed for the treatment of GUCY2C-expressing metastatic colorectal cancer.
