Target Details

Background:	CUB domain containing protein 1,CD318 (CUB domain containing protein 1) is a complement
	domains-containing transmembrane glycoprotein, which takes part in early hematopoiesis. It is
	expressed on CD34+CD133+ bone marrow cells, keratinocytes, and in human colorectal and
	breast cancers. It is being used as a marker of mesenchymal stem-like cells, neural progenitor
	cells, and also as an independent marker for the diagnosis of myeloid leukemias.,CDCP1,
