Target Details

Alternative Name:	Selenium Binding Protein 1 (SELENBP1 Products)
Background:	<p>Synonyms: SBP, SBP1, Selenbp2, Selenium binding protein 2, Selenium binding protein1, SELNBP1, SP56, 56 kDa selenium binding protein.</p> <p>Background: Selenium is an essential trace element that confers tolerance to toxicity arising through exposure to heavy metals or other reactive xenobiotics. Selenium exhibits potent anticarcinogenic properties, and deficiency of selenium may cause certain neurologic diseases. Both effects are attributed to selenium-binding proteins. Selenium binding protein 1 is down-regulated in lung adenocarcinoma, colorectal cancer and ovarian cancer. It is two-fold upregulated in the brains of patients suffering from schizophrenia, and is therefore a biomarker for this disease.</p>
