## Target Details

Background:	Synonyms: LON, LONP, hLON, LonHS, PRSS15, Lon protease homolog, mitochondrial, Lon
	protease-like protein, Mitochondrial ATP-dependent protease Lon, Serine protease 15, LONP1
	Background: ATP-dependent serine protease that mediates the selective degradation of
	misfolded, unassembled or oxidatively damaged polypeptides as well as certain short-lived
	regulatory proteins in the mitochondrial matrix. May also have a chaperone function in the
	assembly of inner membrane protein complexes. Participates in the regulation of mitochondrial
	gene expression and in the maintenance of the integrity of the mitochondrial genome. Binds to
	mitochondrial promoters and RNA in a single-stranded, site-specific, and strand-specific
	manner. May regulate mitochondrial DNA replication and/or gene expression using site-
	specific, single-stranded DNA binding to target the degradation of regulatory proteins binding to
	adjacent sites in mitochondrial promoters. Endogenous substrates include mitochondrial
	steroidogenic acute regulatory (StAR) protein.
Gene ID:	9361

UniProt:

P36776
