Background:	Synonyms: BRCA1-associated RING domain protein 1, BARD-1, BARD1	
	Background: Probable E3 ubiquitin-protein ligase. The BRCA1-BARD1 heterodimer specifically	
	mediates the formation of 'Lys-6'-linked polyubiquitin chains and coordinates a diverse range of cellular pathways such as DNA damage repair, ubiquitination and transcriptional regulation to	
	maintain genomic stability. Plays a central role in the control of the cell cycle in response to	
	DNA damage. Acts by mediating ubiquitin E3 ligase activity that is required for its tumor	
	suppressor function. Also forms a heterodimer with CSTF1/CSTF-50 to modulate mRNA	
	processing and RNAP II stability by inhibiting pre-mRNA 3' cleavage.
