## Target Details

Background:	Synonyms: L3, LASS2, SP260, TMSG1, Ceramide synthase 2, CerS2, LAG1 longevity assurance			
	homolog 2, Tumor metastasis-suppressor gene 1 protein			
	Background: LASS2 (LAG1 homolog, ceramide synthase 2) has sequence similarity to yeast			
	longevity assurance gene 1. It is thought to be involved in sphingolipid synthesis. Expression of			
	LASS2 is transiently increased during the period of active myelination and is specifically			
	localized to white matter tracts of the brain, including the Schwann cells of sciatic nerves			
	suggesting that LASS2 is important for the synthesis of dihydroceramide used for synthesis of			
	myelin sphingolipids. Expression of LASS2 in hepatocellular carcinoma cell lines suppresses			
	the growth of cancer cells.
