

## Datasheet for ABIN7094700 **anti-AMH antibody (C-Term)**

[Go to Product page](#)

### Overview

|                      |                                    |
|----------------------|------------------------------------|
| Quantity:            | 100 µL                             |
| Target:              | AMH                                |
| Binding Specificity: | C-Term                             |
| Reactivity:          | Human, Mouse, Rat                  |
| Host:                | Rabbit                             |
| Clonality:           | Polyclonal                         |
| Conjugate:           | This AMH antibody is un-conjugated |
| Application:         | Western Blotting (WB), ELISA       |

### Product Details

|                       |                                                                                                        |
|-----------------------|--------------------------------------------------------------------------------------------------------|
| Immunogen:            | A synthesized peptide derived from human AMH, corresponding to a region within C-terminal amino acids. |
| Isotype:              | IgG                                                                                                    |
| Specificity:          | AMH Antibody detects endogenous levels of total AMH.                                                   |
| Predicted Reactivity: | Pig,Bovine,Dog                                                                                         |

### Target Details

|                   |                                      |
|-------------------|--------------------------------------|
| Target:           | AMH                                  |
| Alternative Name: | AMH ( <a href="#">AMH Products</a> ) |
| Gene ID:          | 268                                  |

## Target Details

|           |                                                          |
|-----------|----------------------------------------------------------|
| UniProt:  | <a href="#">P03971</a>                                   |
| Pathways: | <a href="#">Negative Regulation of Hormone Secretion</a> |

## Application Details

|                    |                                                 |
|--------------------|-------------------------------------------------|
| Application Notes: | WB 1:500-1:2000, ELISA(peptide) 1:20000-1:40000 |
| Restrictions:      | For Research Use only                           |

## Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Buffer:            | Rabbit IgG in phosphate buffered saline , pH 7.4, 150 mM NaCl, 0.02 % sodium azide and 50 % glycerol.                  |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | Store at -20 °C. Stable for 12 months from date of receipt.                                                            |
| Expiry Date:       | 12 months                                                                                                              |
